

this location it is presumed to be “off-axis” of the prevailing wind direction and therefore, of any particulate or gas plume emitted by the galvanizing facility. This site is designated as the “**Off-Axis Site**” and its location is shown in Figure 1. TSP samples were collected at this site beginning January 24, 2007.

Figure 1. Site Locations

The details of sampling systems and periods of operation are listed in Table 2.
